MEMORANDUM FOR:

Hej
STAT

Jack,

Per my report to you Friday, I've looked over list and tried to assure he is as specific as possible. I added a couple of things which will also need doing after you have him pinned down.

STAT

a. Layout of the analytic research process - several existing scenarios and emphasis, source flow of information - time response - capability (analysts) - use of analysts' time - etc.

b. - and all this entails to get the disparate evaluation data (e.g., recent peripheral recce inputs, etc.) assembled to use in developing measures of relevance.

STAT

c. Assessment of IC product in the process. Evaluations of usefulness of our own IC products, methodologies, etc. in the decision machinery.

The Group Chiefs are working with as is the Coordination Staff, and I expect he'll be returning to you with their comments on his list. I believe we are all together.

STAT

STAT

Note: Key here is to pin him down to a very specific objective with results forthcoming in shorter time frame than he envisages.
